

Integration Services

Installing an IGT System at a customer site is far from a plug and play model. Different operators have different resources, timing, technological and business needs across their property. Floor sizes and the number of EGMs can stretch networking loads; different parts of a casino might have different peripherals such as printers with different configuration needs.

IGT Systems Integration is the best in the business. We install the latest technology and configure to your functional needs.

Drive Business Value.

- System installation or upgrades performed and configured by IGT mean greater performance, and features for your floor
- Service package options based on customer needs

Available package groups:

Installation & Upgrade.

IGT ensures the delivery, installation and configuration of your IGT systems. When upgrades are needed to provide additional capacity and capability, trained IGT professionals are available to get the job done fast.

IGT Upgrade Plus.

During an upgrade, patron and accounting data needs to be converted, leading to extended downtime of some systems. The IGT Upgrade Plus uses IGT staff and equipment to decrease downtime.

Content Services.

IGT technology allows for content to run across a number of different types of devices to message guests for the purposes of communicating, informing, and adding excitement in the player experience. This service brings operators several different content options that will add value to a floor.

Additional services.

Education Services, Support Services.

Talk with your IGT representative to learn how our service options can help.
