

Cardless Connect™

Card in without the card.

A player sits down and points their phone at the gaming machine. Suddenly, the player display shows the player's name and all available balances (Point Play, Xtra Credit, and Cashless are available balances to show). When the player leaves, the app automatically cards them out.

Welcome to the modern world.

IGT's Cardless Connect™ product enables players to card in to an EGM without a physical card, removing a common barrier to play, and modernizing the player experience at your casino.

Even better, paper tickets become a thing of the past with the Cardless Connect™ software. Where approved, players can transfer funds to the game via their phone.

The Cardless Connect™ product integrates into your property's app, driving use and keeping your brand front and center.

Join leading customer-service companies with a practical app for your players.

The Cardless Connect™ product integrates into your property's app, driving your app adoption and keeping your brand front and center.

Becoming a Cardless Connect enabled Casino will allow players to have the same mobile experience as when they pay for coffee, get on a plane, or deposit checks. Join leading customer-service companies with a practical app for your players.
